

Safe Nkap: A web application for micro finances

Safe Nkap is a web application I built using php. It is a client-server web app initially developed as an account management system for micro finances account holders. I took into consideration the fact that most sellers are gathered by an agent sent by a micro finance bank (credit union for example). This agent helps in noting and collecting any amount they give in order to save into their account.

With the introduction of this app, every activity could be done whilst directly been in contact with your account. This could also facilitate the user in making withdrawals from his account.

I will proceed by presenting the interface of the project.

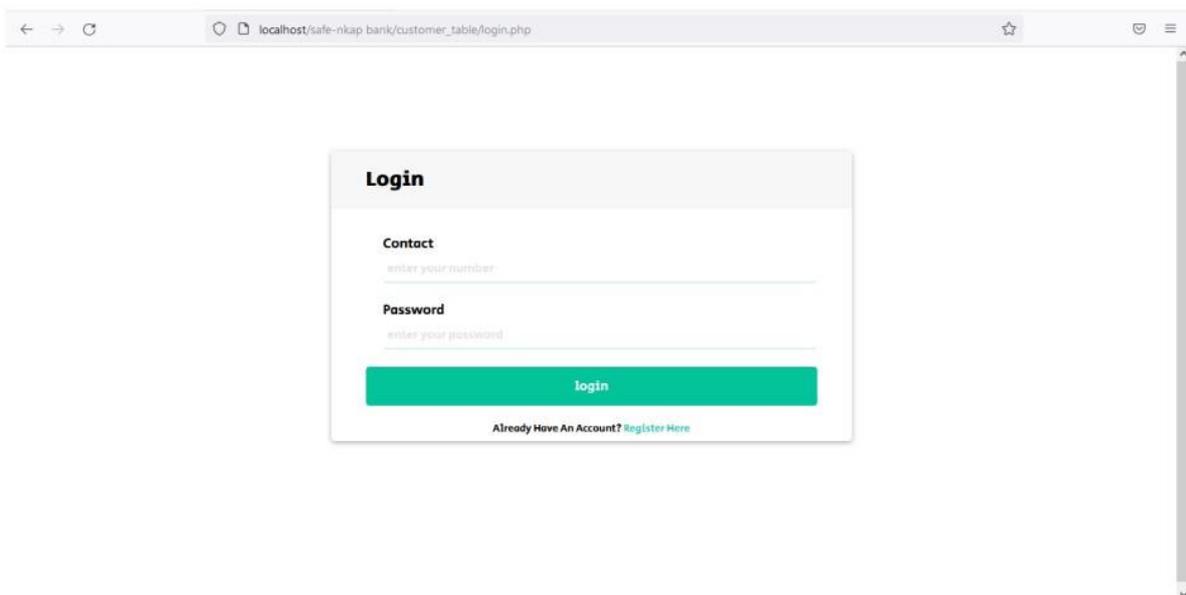

1. Login and sign up pages of the app.

The screenshot shows a web browser window with the URL `localhost/safe-nkap bank/customer_table/registration.php`. The page is titled "Create Account" and features a registration form with the following fields:

- Name**: enter your name
- Sur-name**: enter your sur-name
- Address**: enter your email
- Location**: enter your residence
- Date Of Birth**: mm / dd / yyyy
- Contact**: enter your name
- Username**: enter your name
- Password**: enter a password
- Re-write Password**: retype your password
- ID Card Number**: enter your ID card number

Below the form, there is a dropdown menu with "savings" selected and a green "register" button. At the bottom, there is a link: "Already Have An Account? [Login](#)".

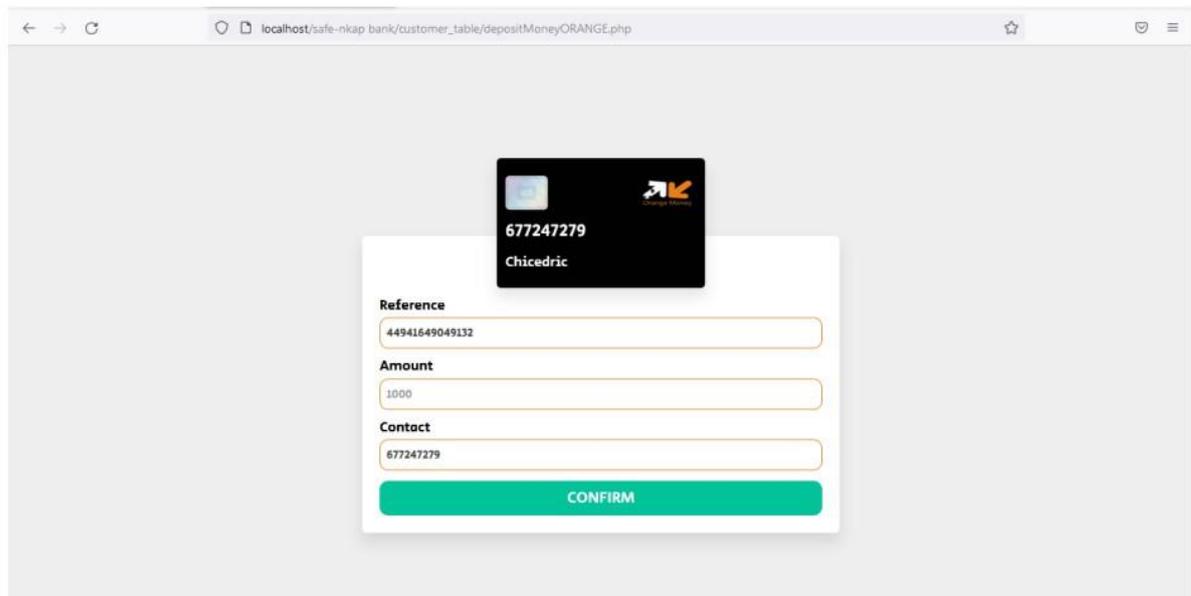

The screenshot shows a web browser window with the URL `localhost/safe-nkap bank/customer_table/login.php`. The page is titled "Login" and features a login form with the following fields:

- Contact**: enter your number
- Password**: enter your password

Below the form, there is a green "login" button. At the bottom, there is a link: "Already Have An Account? [Register Here](#)".
